Speech & Language
Disorders
Adults

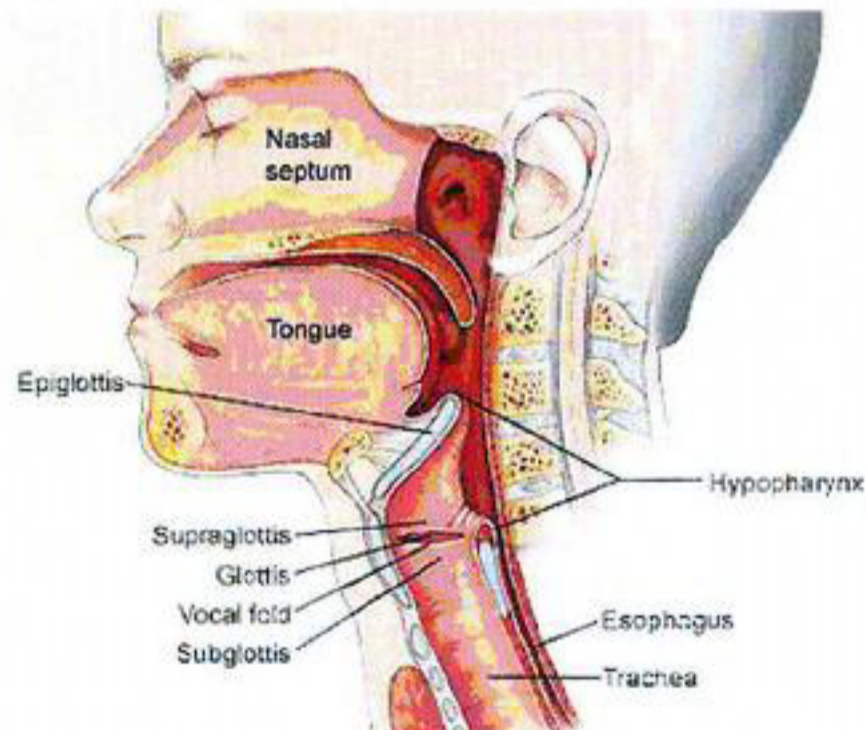

Evaluations & Therapy

for the following:

Articulation & Phonological Disorders
Language Disorders relating to Autism
Language Disorders relating to Aspergers
(Pervasive Developmental Disorders)
Frontal Lisp (Tongue Thrust)
Fluency - Stuttering - Cluttering
Vocal Fold Paralysis
Vocal Abuse
Cleft Palate Articulation - Voice & Resonance
Dysarthria - Aphasia - Apraxia

If you are seeking Speech Therapy, more than likely you are experiencing difficulties with either one or more of the following 4 functions of speech:

Respiration - Phonation - Articulation - Resonation

Speech Therapy is an art of shaping, redefining and targeting specific goals.
Each client's needs are not the same.

Even when the goal is the same, treatment is always client specified, resulting in a productive outcome.

Certified Member of the American Speech-Language Hearing Association
